Professional Summary

Data Science postgraduate with hands-on project experience in Machine Learning, Data Analysis, and application deployment. Skilled in Python, SQL, machine learning, data preprocessing, exploratory data analysis, model evaluation, and Streamlit. Developed and deployed a Heart Disease Prediction application as a live web project. Interested in Machine Learning, Artificial Intelligence, Data Analytics, and building practical data-driven solutions. Seeking an entry-level opportunity to apply technical skills, gain industry experience, and contribute to real-world projects.

Technical Skills

Programming: Python, SQL

Machine Learning: Supervised Learning, Classification, Regression, Feature Engineering, Model Evaluation

AI & Data Science: Artificial Intelligence, Machine Learning, Data Analysis, Exploratory Data Analysis

Libraries & Tools: Pandas, NumPy, Matplotlib, Scikit-learn

Deployment & Development: Streamlit, Render, Git, Streamlit Cloud

Web Development: HTML, CSS, JavaScript, PHP

Projects

Heart Disease Prediction using Machine Learning [Live]

- Developed an end-to-end machine learning solution to predict the likelihood of heart disease from patient health parameters.
- Performed data preprocessing, exploratory data analysis, feature engineering, and preparation of data for machine learning.
- Trained and compared multiple classification algorithms and evaluated their performance using accuracy, precision, recall, and F1-score.
- Selected the best-performing model based on evaluation results and integrated it into an interactive application.
- Developed a user-friendly Streamlit application that accepts patient inputs and generates a model-based prediction.
- Deployed the application online on Render, demonstrating a complete machine learning workflow from data preparation to live deployment.

Education

Savitribai Phule Pune University

Master's of science in Data Science

2026

Pune, India

Certifications

Data Science Machine Learning — SevenMentor

Course Duration: March 18, 2025 – June 25, 2025 / Issued: August 13, 2025

Core Competencies

Problem Solving | Analytical Thinking | Machine Learning | Data-Driven Decision Making | Continuous Learning
